

Cod. VE140A01

The diagram is a Shear Force Diagram (SFD) for a beam. The vertical axis represents shear force in kNm, ranging from 0 to 1500 with major grid lines every 125 units. The horizontal axis represents the cumulative load in kN, ranging from 0 to 7000 with major grid lines every 1750 units. The shear force starts at 625 kNm at 0 kN, increases linearly to a peak of 875 kNm at 1000 kN, and then decreases linearly to 0 kNm at 3500 kN. The area under the curve is shaded light blue.

Load (kN)	Shear Force (kNm)
0	625
1000	875
3500	0
